

TESSUTO NON TESSUTO SPUNLACE

Materiale di derivazione mista, naturale e/o sintetica, le cui fibre sono fissate tra loro tramite intreccio, il che rende il tessuto estremamente resistente alla trazione e soffice. Si presenta generalmente liscio, è morbidissimo e drappeggia esattamente come una vera stoffa. Nasce bianco e può essere stampato con un fissaggio dei colori ad “effetto tessile”.

Lo smaltimento corretto è nella frazione secca della differenziata (si consiglia verifica con le Amministrazioni Locali)
